Dublin Core Application Profile for a Podcast

•••

INF S385T | Dr. Sam Oh | Presented by Bethany Radcliff

Purpose, Scope, and Audience

Purpose, Scope, and Audience

- This schema's purpose is to more accurately and specifically describe podcasts, while remaining interoperable with the existing Dublin Core metadata standard.
- This schema would be fitting for classifying any podcast that minimal information can be gathered about.
- The target audience would be those interested in more easily discovering podcasts, and those who would like to more easily describe podcasts
- I looked at multiple podcast platforms to generate gaps in the way podcast information is presented

ABOUT   **About/Show Description**

From Samin Nosrat (chef and author of the cookbook Salt Fat Acid Heat) and Hrishikesh Hirway (creator and host of the podcast Song Exploder), Home Cooking is a mini-series to help you figure out what to cook—and keep you company—during the quarantine. If you need help or just want some creative inspiration for your kitchen, we've got you covered. Do you have a quarantine cooking question, story, or anxiety you want to share with us? Send a voice memo to us at alittlehomecooking@gmail.com, or call us at 201-241-COOK.

	rating	The rating(s) of a podcast episode or show. This is a type of relation.
	review	A review(s) of the podcast episode or show. This is a type of relation.
	transcript	A link to the transcript of the podcast.

DC language type

14. Language

DC Term	podUT Term	Definition
language		"A language of the resource."

Further Thoughts

- If I had more time to revise, I would've created a way to identify seasons and episode numbers

- The creator/contributor role types could be further expanded to include more specific roles, like editor, mixer, audio master, logo artist, etc.

- There's always a balance between schema inclusivity and the schema creator's ability to be exhaustive in thinking about what might need classification. This is the hardest aspect of schema creation in my opinion.

Thanks!
